

Industry-leading solutions for nurses

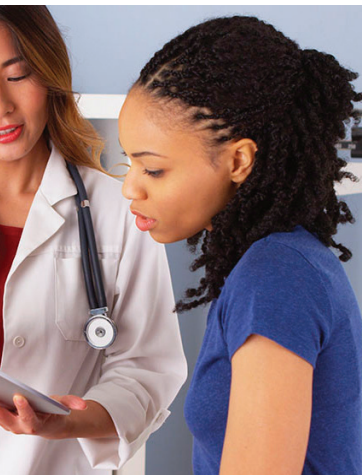

Whether you are developing a performance improvement plan, seeking to complement your existing clinical decision support with evidence-based content, aligning your care guidance to the latest CMS measures, or seeking support from a trusted knowledge provider, **ZynxCare** solutions can help. Our clinical guidance enables thousands of hospitals, facilities, and clinicians to significantly improve patient outcomes, lower costs, standardize care, and maximize reimbursement every day. We offer content for hospitals, skilled nursing facilities, home health agencies, and more. Take the first step to improving patient care by discovering which ZynxCare solution is right for your organization.

ZYNXCARE

ZynxCare, the industry's leading clinical decision support solution for plans of care, features customizable evidence-based care guidance for nursing and interdisciplinary teams.

ZynxCare has received multiple industry honors including **7 Best in KLAS Clinical Decision Support Awards**. It features a comprehensive library of over 390 plans of care with interventions that drive care standardization and are shown to improve patient outcomes tied to reimbursement. Reduce clinical variation, improve patient and staff satisfaction, and maximize financial performance. Deploy ZynxCare plans of care into your EHR and access at the point of care to guide vital decision making and care planning for your patients.

ZYNX FOR CHRONIC CARE MANAGEMENT

Zynx for Chronic Care Management enables your care teams to provide expert patient care to drive long-term recovery and reduce unnecessary rehospitalizations of patients with challenging, long-term health concerns.

Our content aligns with the Utilization Review Accreditation Commission's disease management measures and with the National Committee for Quality Assurance's accreditation standard for population health certification.

ZYNXCARE FOR HOME HEALTH

ZynxCare for Home Health enables your home health staff to provide expert care, driving at-home patient recovery aligned with Joint Commission and Centers for Medicare and Medicaid Services core measures.

ZynxCare for Home Health content supports:

- ◆ OASIS and Medicare
- ◆ CMS Home Health Quality Reporting Program
- ◆ CMS Home Health VBP Program Measure
- ◆ TJC National Patient Safety Goal for Home Care

CUSTOMIZE & DEPLOY

Easily tailor content to the specific needs of your patients. ZynxCare's evidence-based plans of care are fully customizable with **AuthorSpace**, our state-of-the-art editing software.

Reach consensus and deploy care plans more quickly. Our collaboration software, **ViewSpace**, enables asynchronous feedback on proposed customizations from all stakeholders, regardless of their location.

ZYNXCARE FOR LONG-TERM ACUTE CARE

ZynxCare for Long-Term Acute Care enables you to meet the complex needs of patients with guidance to promote recovery. Standardize patient treatment and bring the right care to patients at the right time.

Examples of customer-reported impacts and benefits:

- ◆ Satisfaction of federal regulations (eg, CMS and Medicaid Services requirements for long-term acute care hospitals)
- ◆ Fewer medication errors, hospital-acquired infections, and pressure ulcers; improved patient safety
- ◆ Less time required to customize patient treatment plans

ZYNXCARE FOR REHABILITATION

ZynxCare for Rehabilitation provides expert patient care guidance to drive long-term recovery and reduce unnecessary rehospitalizations. It features foundational evidence- and experience-based content to help therapists and nurses deliver the highest-quality rehabilitative care while simultaneously meeting essential regulatory requirements.

Additionally, ZynxCare for Rehabilitation targets all phases of the rehabilitation process including acute rehabilitation, early post-operative rehabilitation, home-based care, moderate protection and early strengthening phase, moderate to advanced strengthening phase, outpatient rehabilitation, and more.

ZYNXCARE EXTENDED

ZynxCare Extended was developed especially for skilled nursing and allied health teams. Simultaneously deliver the highest-quality postacute patient care and meet complex regulatory requirements.

Examples of customer-reported impacts and benefits:

- ◆ Align patient care with CMS' Skilled Nursing Facility Value-Based Program to Reduce Risk
- ◆ Reduced 30-day readmission rates (resulting in a decreased risk of financial penalties)
- ◆ Develop long-term care-planning strategies

ZYNXCARE+ PATIENT EDUCATION

ZynxCare+ Patient Education combines the clinical decision support of ZynxCare with an expansive library of easy-to-understand patient education material to drive better outcomes.

ZynxCare+ Patient Education features teaching points that are embedded within the plan of care. Patient education opportunities appear next to these teaching points and help to ensure that clinicians add the information to the patient portal. Reduce clinician workload while enhancing the consistency of care.
