

Integrate your healthcare apps and systems with the industry's leading evidence-based content.

## Introducing the Zynx Health API.

We are excited to present the **Zynx Health API**, your gateway to a wealth of healthcare knowledge easily accessible through HL7's FHIR healthcare data standard.

By seamlessly integrating Zynx Health content via the FHIR standard, developers now wield a robust tool to effortlessly access and exchange healthcare data. Whether you're constructing new health apps or elevating existing systems, our API ensures your solutions remain at the forefront of healthcare technology.

Accessing the Zynx Health API provides developers with many distinct advantages:

**Out-of-the-Box Interoperability:** Communicate and exchange data across multiple applications and devices with ease.

**Innovation:** Create new applications, tools, and services to meet today's more pressing healthcare challenges head on.

**Data Exchange:** Access vital data to guide the decision-making process.

**Enhanced Patient Care:** Real-time access to data leads to better patient outcomes and increased patient satisfaction.

**Efficient Workflows:** Reduce administrative burden and improve productivity by accessing the information you need quickly.

Join us in spearheading the next era of healthcare innovation, while effortlessly incorporating Zynx Health's Best in KLAS evidence-based content into your systems today. For detailed information on how your developers can establish connectivity to Zynx Health's FHIR-enabled resources, visit [zynxhealth.com/developer-program](https://zynxhealth.com/developer-program) or phone **888.333.ZYNX (9969)**.
